## DETAILED ACTION

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 6-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 6, it is unclear if by O-methoxy, O-ethoxy, etc., applicants mean an alkoxy group, i.e., -OCH<sub>3</sub>, for example, or a group, -O-OCH<sub>3</sub>; as such, the claim is indefinite.

In claims 7-11, applicants do not recite what "halo compounds" are reacted with garcinol or isogarcinol, thereby rendering the claims indefinite.

In claims 12 and 13, the examiner is not clear what "disease condition" is being treated when applicants recite AIDS. AIDS is a designation given to a person positive with the HIV virus, which entails a compromised immune system leaving a patient susceptible to many different "disease conditions". So, in this instance, it is unclear what exactly is being treated. Also, HIV is not a *disease condition*, but rather, is the name of a specific virus.

***Claim Objections***

Claims 10 and 12 are objected to because of the following informalities: the claims use improper Markush language. A "group comprising" should read, "A group consisting of". Appropriate correction is required.

***Specification***

The disclosure is objected to because of the following informalities: a brief description of the drawings is missing. Appropriate correction is required.
